

USCIS production access affidavit request — SENT Sep 11, 2026

Drafted by Claude Code, Sep 11, 2026. Peter tried sending it himself from `info@casewhy.com` first and it didn't go out (cause not diagnosed). Peter then asked Claude Code to send it — sent via Claude Code's Gmail tool, real confirmed delivery: Gmail message ID `1a0908fbb2ddc3e0`, 2026-09-11 13:02 UTC, to `developersupport@uscis.dhs.gov`. **Note: it went out From: ptakla@gmail.com, not info@casewhy.com as the header below says** — that's the only identity Claude Code's Gmail tool can send as. The body still signs off with `info@casewhy.com` as the reply-to contact. See `CLOUD_CLAUDE.md`'s "USCIS API access" section for the full note, including the still-open question of why the `info@casewhy.com` send path failed.

To: developersupport@uscis.dhs.gov **From:** info@casewhy.com **Subject:** Production Access Affidavit Request — CaseWhy LLC (Case Status API)

Hello,

We're requesting the production access affidavit for the USCIS Case Status API, as the next step in the Torch API onboarding process.

Developer account details:

- Business/Organization name: CaseWhy LLC
- Business home page: <https://casewhy.com>
- Developer account email: info@casewhy.com
- API: Case Status API (Torch)

We've completed the 5-consecutive-calendar-day sandbox traffic requirement, Monday, September 7 through Friday, September 11, 2026 — real success and error-path calls each day through our integration. CaseWhy LLC's Florida formation was also confirmed by the state on September 10, 2026 (Northwest Registered Agent, order #88978WW).

Please let us know if there's anything further you need from us to issue the affidavit, or if there's a preferred format/process for returning it once signed.

Thank you, Peter Takla Founder, CaseWhy LLC info@casewhy.com

Sourcing note: required fields (business/organization name, business home page URL, authorized signatory) pulled directly from the USCIS Torch API onboarding execution spec's step 06. No placeholders remaining — ready to send.
